WORK EXPERIENCE

Antelis Electronics

Front-End Developer

Nov 2023 - Oct 2024

- Developed **responsive web application** using React.js, React Native, TailwindCSS.
- Worked in a **Scrum team**, collaborating closely on design discussions, task prioritization, and delivering high-quality features.
- Optimized map element processing and rendering, increasing application performance by 30%.
- Implemented **unit and integration testing with Jest**, reducing bugs by 50%.

EDUCATION

BSU (Belarusian State University)

Cybersecurity

Sep 2021 - Oct 2024

EHU (European Humanities University)

Informatics - C#

Oct 2024 - Present (3rd year)

PROJECTS

Agent 2

- Developed Agent 2 - GPS vehicle tracking system for tracking cargo shipments.
- **Optimized real-time transport tracking** and implemented custom map elements, improving loading speed by 30%.
- **Enhanced user experience** by performing comprehensive accessibility checks for web applications, leading to an increase in customer satisfaction as noted through **feedback from nearly 100 users** during testing phases.
- Was part of a 4-member team, contributed on sprint planning, code reviews, and feature implementation.
- Build with **React Native, Node.js, Jest** and **JWT authentication**.

Vissen.uz

- Built a dynamic promotional web app that boosted potential customer interest by 20–25%.
- Created engaging user interfaces with TailwindCSS, leading to positive feedback from clients about design quality and usability.
- Build with **React.js, Babel.js** and **TailwindCSS**.
